

§ 51.2118 Whole.

Whole means that there is less than one-eighth of the kernel chipped off or missing, and that the general contour of the kernel is not materially affected by the missing part.

§ 51.2119 Clean.

Clean means that the kernel is practically free from dirt and other foreign substance.

§ 51.2120 Well dried.

Well dried means that the kernel is firm and brittle, and not pliable or leathery.

§ 51.2121 Decay.

Decay means that the kernel is putrid or decomposed.

§ 51.2122 Rancidity.

Rancidity means that the kernel is noticeably rancid to the taste.

§ 51.2123 Insect injury.

Insect injury means that the insect, web, or frass is present or there is definite evidence of insect feeding.

§ 51.2124 Foreign material.

Foreign material means pieces of shell, hulls or other foreign matter which will not pass through a round opening $\frac{3}{64}$ of an inch in diameter.

§ 51.2125 Doubles.

Doubles means kernels that developed in shells containing two kernels. One side of a double kernel is flat or concave.

§ 51.2126 Split or broken kernels.

Split or broken kernels means seven-eighths or less of complete whole kernels but which will not pass through a round opening $\frac{3}{64}$ of an inch in diameter.

§ 51.2127 Particles and dust.

Particles and dust means fragments of almonds kernels or other material which will pass through a round opening $\frac{3}{64}$ of an inch in diameter.

§ 51.2128 Injury.

Injury means any defect which more than slightly detracts from the appearance

of the individual almond, or the general appearance of the lot. The following shall be considered as injury:

(a) Chipped and scratched kernels when the general appearance of the lot is more than slightly affected, or when the affected are on an individual kernel aggregates more than the equivalent of a circle one-eighth inch in diameter.

§ 51.2129 Damage.

Damage means any defect which materially detracts from the appearance of the individual kernel, or the general appearance of the lot, or the edible or shipping quality of the almonds. Any one of the following defects or combination thereof, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(a) Chipped and scratched kernels, when the general appearance of the lot is materially affected, or when the affected area on an individual kernel aggregates more than the equivalent of a circle one-quarter inch in diameter;

(b) Mold, when visible on the kernel, except when white or gray and easily rubbed off with the fingers;

(c) Gum, when a film of shiny, resinous appearing substance covers more than one-eighth of the surface of the kernel;

(d) Shriveling, when the kernel is excessively thin for its size, or when materially withered, shrunken, leathery, tough or only partially developed: *Provided*, That partially developed kernels are not considered damaged if more than three-fourths of the pellicle is filled with meat; and,

(e) Brown spot on the kernel, either single or multiple, when the affected area aggregates more than the equivalent of a circle one-eighth inch in diameter.

§ 51.2130 Serious damage.

Serious damage means any defect which makes a kernel or piece of kernel unsuitable for human consumption, and includes decay, rancidity, insect injury and damage by mold.

§ 51.2131 Diameter.

Diameter means the greatest dimension of the kernel, or piece of kernel at right angles to the longitudinal axis.
